AHI: Your Personal AI Companion

A New Era of Intelligence That Truly Lives, Learns, and Grows With You.

The Missing Connection

Why current AI feels like a tool, not a companion.

No Real Presence

Most AI today is trapped behind a screen. It doesn't understand your physical world or your daily life.

No Long-Term Memory

Current systems often forget your personal context, requiring you to repeat yourself or start over.

Static Responses

Chatbots are helpful, but they aren't "present." They don't have a sense of space, time, or your

Our Vision: A Friend That Understands Your World

Beyond the Screen—A persistent, evolving partner that helps you in the real world, not just on a digital device.

Lifelong Learning

Builds a memory of your home, habits, and preferences over time.

Human Intuition

Understands the "why" behind actions and events in your world.

True Companion

A persistent presence that grows with you throughout your life.

The "Brain" Behind the Companion

Our AI learns from visual and physical experiences, much like a child discovers the world.

It doesn't just process data; it builds a "memory" of your home, your habits, and your preferences over time.

Natural Memory

A system that remembers important things forever while quickly learning new tasks without confusion.

Smart Planning

Thinks ahead and plans complex actions, from navigating a new room to assisting with daily chores.

Efficiency First

Powerful yet efficient, running on everyday devices without needing massive, expensive data centers.

AI That Truly Adapts to You

Instant Home Familiarity

AHI learns the layout of your home in a single session and adapts to changes instantly, just like a human would.

Deep Personal Context

It remembers your history, your medical needs, and your favorite ways of doing things, building a lifelong bond.

Natural Interaction

Talk to it, show it something, or let it observe—it understands voice, text, and video to respond naturally.

GROUNDED INTELLIGENCE: DESIGNED FOR THE REAL WORLD

Hardware Ready

Our "brain" is ready to be placed into home robots, assisting you physically and emotionally in your daily life.

Enhancing Every Part of Life

Personalized Care

A lifelong companion for the elderly or those with health needs, remembering every detail of their care and history.

Intuitive Education

A tutor that understands a student's unique learning style and pace, growing with them over years of discovery.

Physical Assistance

Helping with chores, organizing the home, and managing daily logistics with human-like ease and understanding.

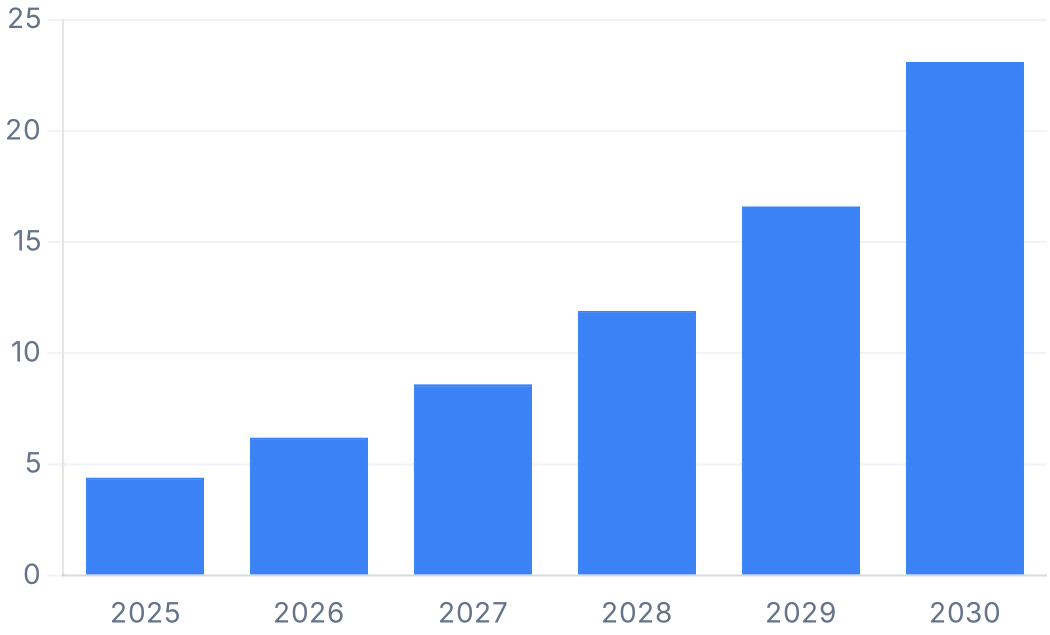
A Family Member

Transitioning from a gadget to a trusted member of the household that requires no retraining and grows with you.

GROUNDED INTELLIGENCE: A COMPANION THAT TRULY UNDERSTANDS

The Growing World of Personal AI

EMBODIED AI MARKET GROWTH ($B)



Trillions POTENTIAL MARKET BY 2035

Beyond Chatbots

We are moving from a multi-billion dollar chatbot market to a multi-trillion dollar "embodied" AI market. People are seeking deeper, physical companionship.

High Demand: Global interest in home robotics and personal assistants is at an all-time high. We are the brain for this wave.

Bringing AHI to Every Home

Strategic Partnerships

Providing the "intelligence" for leading hardware companies.

Household Subscriptions

Affordable plans for personalized AHI companions.

Hardware Licensing

Partnering with robotics companies to integrate our AHI brain into their devices.

Consumer Premium

Affordable monthly plans for households to have their own personalized AHI companion.

Enterprise Solutions

Custom versions for healthcare providers and specialized education centers.

Open Growth

Using an open foundation to encourage adoption while keeping advanced features for our users.

Our Goal: To make personal AI accessible, helpful, and deeply integrated into daily life for everyone.

Our Journey and the Road Ahead

Prototype Ready

Our core intelligence is already functional and showing incredible results in understanding and navigation.

Proven Learning

Successfully tested the AI's ability to learn new environments instantly without any prior training.

The Path Forward

Current

Core AHI Brain complete and validated in simulation.

Q2 2026

Hardware pilots with leading robotics partners.

Q4 2026

Public Beta: AHI Personal Agent App launch.

2027+

Global scale-up across homes and healthcare.

Why Now is the Time for AHI

We are delivering today what others are only promising for the distant future—with far less compute and a deeper focus on the human experience.

Efficient & Scalable

Our system doesn't require billions in hardware; it's designed to run on everyday devices, making it accessible for everyone.

Defensible Vision

We've combined the best of modern research into a proprietary, human-centric architecture that is built to last.

Perfect Timing

As the world shifts toward personal robotics, the winning software brain is positioned to lead the next decade of innovation.

The AHI Legacy

The first AI that truly knows you and grows with you throughout your life.

A Personal Legacy

Technology that preserves your context and preferences for a lifetime.

Human Connection

Building a helpful, intuitive friend that feels less like a computer.

Our Promise

To deliver a personal AI that is safe, helpful, and deeply integrated into your life.

Join Us in Shaping the Future

Seeking strategic investment and partnerships to scale AHI from prototype to global deployment.
